DETAILED ACTION

Response to Amendment

- 1. This is in response to applicant's amendment dated 02/17/2006 with the following results.
- 2. Claims 9-11, and 14-16 have been canceled. Therefore, claims 1-8, 12-13, and 17-24 remain pending in this application.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 3-4, 8, and 22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation "a single half-word in the second level table corresponds to two hardware register words" is not supported by the disclosure.

Art Unit: 2187

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1-2, 12, 17-19, and 21 are rejected under 35 U.S.C. 102(a and b) as being anticipated by Applicant Admitted Prior Art (AAPA) and Lopez-Aguado (US Patent No. 5,586,283).

As for claims 1, 12, and 17-18, AAPA and Lopez disclose a method of translating a virtual address to a physical address in a real time operating system, the method comprising: indexing into a first level table using a portion of the virtual address; generating an offset to a second level table based on an entry in the first level table combined with a portion of the virtual address; and combining the virtual address with an entry in the second level table obtained using the offset [portion or the virtual address points to a first table, the entry pointed to is combined with further bits point to a second table, the entry in the second table is combined with further bits to point to an entry in a third table (see AAPA's page 1, paragraph 0004; see Lopez's Fig. 1).

Art Unit: 2187

As for claims 2, 19, and 21, AAPA discloses that the entry in the table comprises control bits and valid bits for the pages [see page 1, paragraph 0003]

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 5-7, 13, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA or Lopez in view of a well known features in which official notice is taken.

As for claims 5-7, 13, 20 disclose the claimed invention, but fail to specifically disclose concatenating the virtual address with bits from the entry in the second level table and a process ID to fill control hardware registers. However, concatenating virtual address with the process ID is well known in the art in order to keep track of the memory spaces and the process that is accessing that particular location [for example see patent number 6,643,759 issued to Anderson]. Therefore, it would have been obvious to one having ordinary skill in the art at the time of the current invention to include process ID in accessing the memory location for that particular process.

Art Unit: 2187

Allowable Subject Matter

9. Claims 23-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

- 10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See attached PTO-892.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser G. Moazzami whose telephone number is (571) 272-4195. The examiner can normally be reached on 7:00AM-5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Donald Sparks can be reached on (571) 272-4201. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

12. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Art Unit: 2187

Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
